

| 20161006 HKIBIM Parametric Design

Open BIM

- + separate models
- + clear responsibilities
- parallel databases
 - multiple input and changes
- huge comparison effort
 - lot of communication
- no live model

SIDE
Studio for Information Design

Closed BIM

- + shared database
- + live model
- + same software environment
- same software environment
- difficult change management
- no parallel working possible

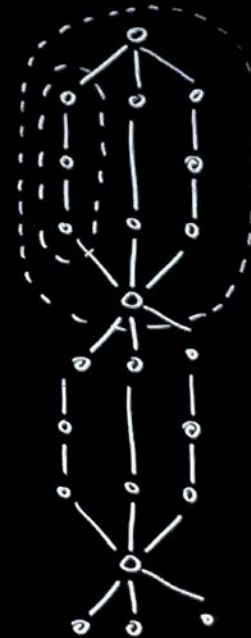

Hybrid BIM

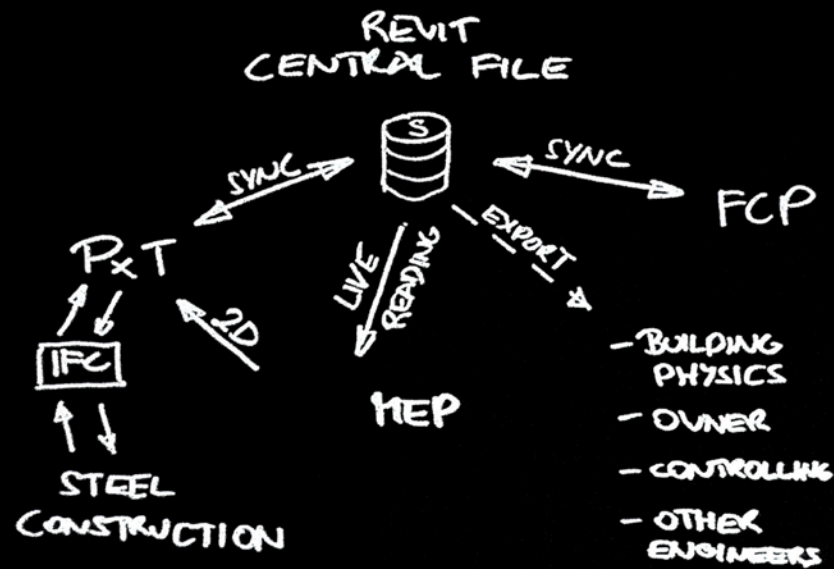

- + separate models
- + clear responsibilities
- + shared databases
- + live model
- + parallel working possible
- + independant software environment

Hybrid BIM

- + separate models
- + clear responsibilities
- + shared databases
- + live model
- + parallel working possible
- + independant software environment
