Kitemark™ Certificate

This is to certify that:

Advanced Construction Information
Development Limited
A2, 35/F, TML Tower
3 Hoi Shing Road
Tsuen Wan
New Territories
Hong Kong

Holds Certificate Number:

KM 697940

In respect of:

ISO 19650:2018

Achieved BIM for design, construction and commissioning in accordance with ISO 19650-1:2018 and ISO 19650-2:2018 following the assessment of projects which includes client satisfaction and collaborative engagement with the delivery team

This issues the right and licence to use the Kitemark in accordance with the Kitemark Terms and Conditions governing the use of the Kitemark, as may be updated from time to time by BSI Assurance UK Ltd (the "Conditions"). All defined terms in this Certificate shall have the same meaning as in the Conditions.

The use of the Kitemark is authorized in respect of the Product(s) detailed on this Certificate provided at or from the above address.

For and on behalf of BSI:

Chris Lewis - Certification Director, Product Certification

First Issued: 2018-11-13
Latest Issue: 2020-01-20

Effective Date: 2020-01-20
Expiry Date: 2021-11-12

Page: 1 of 2

...making excellence a habit.™

This certificate has been issued by and remains the property of BSI Assurance UK Ltd, Kitemark Court, Davy Avenue, Knowlhill, Milton Keynes MK5 8PP, United Kingdom and should be returned immediately upon request. To check its validity telephone +44 (0) 345 080 9000. An electronic certificate can be authenticated [online](#).

BSI Assurance UK Limited, registered in England under number 7805321 at 389 Chiswick High Road, London W4 4AL, UK. A member of BSI Group of Companies.

Kitemark™ Certificate

No. KM 697940

ISO 19650-2:2018 Organization and digitization of information about buildings and civil engineering works, including building information modelling (BIM) - Information management using building information modelling. Part 2: Delivery phase of the assets.

Specialist consultant including design/BIM consultancy and BIM management services, covering architectural, structural and building services design, process documentation, coordination, model authorship, data/information management and process support, using building information modelling on behalf of clients, Tier 1 contractors and the associated project design/construction/F.M. supply chain.

Achieved BIM for design, construction and commissioning in accordance with ISO 19650-1:2018 and ISO 19650-2:2018 following the assessment of projects which includes client satisfaction and collaborative engagement with the delivery team.

This Kitemark certificate covers activities carried out at all A.C.I.D. Hong Kong sites.

DIGITAL DESIGN & CONSTRUCTION CENTRE (DCCC)

The design for Digital Design & Construction Centre (DCCC) is not only about the excellent outcomes, but also focuses on the overall workflow and approach of the very flexible fully-adapted of Building Information Modelling (BIM) process from the very beginning of the project life cycle.

Site plan

The DCCC of Employment Digital & Construction Centre is one of the design with BIM facilities.

The importance of this site plan lies in the fact that it is the first step in the design process. It provides a clear overview of the building's location and its relationship to the surrounding environment. This information is crucial for the design team to make informed decisions about the building's form, function, and sustainability.

Design Philosophy

The design philosophy of the building is based on the principles of sustainability, innovation, and performance. The building is designed to be a model of sustainable design, with a focus on reducing its carbon footprint and improving its energy efficiency.

Using digital design to create a sustainable building form.

12 Designer Options Solar Analysis

Materials Selection/Transportation

Design team will select the different building materials and transport them to the building site. The design team will also select the different building materials and transport them to the building site.

Final Designer Solar Analysis

The building team will select the different building materials and transport them to the building site. The design team will also select the different building materials and transport them to the building site.

L Block R Block

Planning Development

The design team will select the different building materials and transport them to the building site. The design team will also select the different building materials and transport them to the building site.

Digital Design & Construction Centre (DCCC)

BIM Experience in the Virtual Reality

We are not only using BIM as a Design Platform to produce drawings, but also use it to review the design in the Virtual Reality. Future has been using to review the design in the virtual platform to facilitate the design team during the development. Adjustment of design can be reflected immediately in the virtual world.

Office

An Arcium with Interlocking forms to absorb Skylight with Glass Roof located on the L Block Bif with pool garden. With the BIM platform and collaboration with the structural discipline, an outdoor garden with solid in sunbait slabs can be achieved easily.

Workshop

Two Skylights located on the workshop to allow Exhibition Areas for sunset to gather and receive.

Design & Construction Consulting Group
 00852 3500 0000 | 00852 3500 1000 | 00852 3500 1000

BIM Collaboration

It was obvious that the competition is to promote the practical aspects of BIM through collaboration and competitive learning approach in construction industry. Architectural, Structural & Building Services had been working together since the beginning of the design progress, the close collaboration ensure the BIM platform can be served as a lesser way compare to the traditional method of WORKING AS A TEAM.

Section A-A

The Section Shows the collaboration in different disciplines in the BIM platform. With the help of the BIM platform, the design team can work together to create a more efficient and effective design process. The BIM platform can be used to create a more efficient and effective design process.

Entrance Atrium

The Entrance Atrium is located in between two Building Blocks with internal lighting and function as a "STACK EFFECT" ventilation zone for both of the buildings.

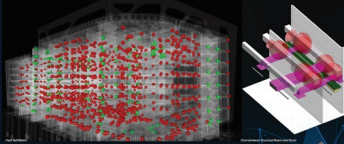

ncic

Design & Construction Technology Centre

600 North Bridge Road, #09-01, Singapore 078263

Clash Prioritization

Although the BIM platform provides a comprehensive method to construct the building, Clash areas are still not yet be seen easily without professional judgment. We have developed a Clash Prioritization in order to review the most important part of the conflict in between different discipline. Clash list can be reviewed as a marker for designer to review their input which save time and reduce issues before construction stage.

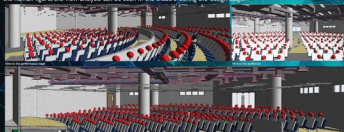

Clash to be resolved

When the listed set of the clash between different disciplines get to be released. However, with the BIM platform and Clash Prioritization, there have sufficient evidence to review and understand the problem to be reviewed and carry on to the next stage.

There may have no PERFECT answer to resolve conflict yet, but we believe by using the BIM platform, experience clashes can be reduced in the early design stage of the project.

Theatre

Here, you can ensure the audience can go the best route into the theatre! By using the digital computer with the IFCAD of the human figure, the view analysis can be seen in the theatre during the design stage.

特約專欄

建築信息模擬成就嘉許禮 建造業議會：「創新提升競爭力」

BIM

建築信息模擬 (Building Information Modeling/建築信息模型) 是建築工程設計、施工及營運管理階段的一組新技術及支援數目管理方面的工具。結合全球資訊科技、虛擬現實技術 (VR)、無線射頻識別技術 (RFID)、雲端儲存 (Cl)、可支援雲端工作協作的數位化信息技術及設備，以協助建築師提高建築建造過程、並提升工程協調、施工安全及綜合效能、質素管理與綠建築。

優缺點分析創新項目團隊

隨著數據技術的發展日益成熟，香港不少建築項目都開始嘗試使用數據技術，為項目團隊帶來便利。雖然數據技術在建築項目中應用廣泛，但使用數據技術也面臨一些挑戰。建築項目團隊在應用數據技術時，應考慮以下因素：

● 數據安全與隱私：數據技術在應用過程中，應確保數據的安全性和隱私性，防止數據洩露或被非法利用。

● 數據質量與準確性：數據技術在應用過程中，應確保數據的質量和準確性，防止數據失真或被篡改。

● 數據集成與互操作性：數據技術在應用過程中，應確保數據的集成和互操作性，防止數據孤島或被隔離。

● 數據標準與規範：數據技術在應用過程中，應確保數據的標準和規範，防止數據混亂或被誤用。

● 數據培訓與教育：數據技術在應用過程中，應確保數據的培訓和教育，防止數據使用不當或被誤解。

● 數據監管與評估：數據技術在應用過程中，應確保數據的監管和評估，防止數據使用不當或被誤解。

● 數據創新與發展：數據技術在應用過程中，應確保數據的創新和發展，防止數據使用不當或被誤解。

● 數據合作與共享：數據技術在應用過程中，應確保數據的合作和共享，防止數據使用不當或被誤解。

● 數據安全與隱私：數據技術在應用過程中，應確保數據的安全性和隱私性，防止數據洩露或被非法利用。

● 數據質量與準確性：數據技術在應用過程中，應確保數據的質量和準確性，防止數據失真或被篡改。

● 數據集成與互操作性：數據技術在應用過程中，應確保數據的集成和互操作性，防止數據孤島或被隔離。

● 數據標準與規範：數據技術在應用過程中，應確保數據的標準和規範，防止數據混亂或被誤用。

● 數據培訓與教育：數據技術在應用過程中，應確保數據的培訓和教育，防止數據使用不當或被誤解。

● 數據監管與評估：數據技術在應用過程中，應確保數據的監管和評估，防止數據使用不當或被誤解。

● 數據創新與發展：數據技術在應用過程中，應確保數據的創新和發展，防止數據使用不當或被誤解。
