

Augmented Reality

Revit model to 3DS MAX

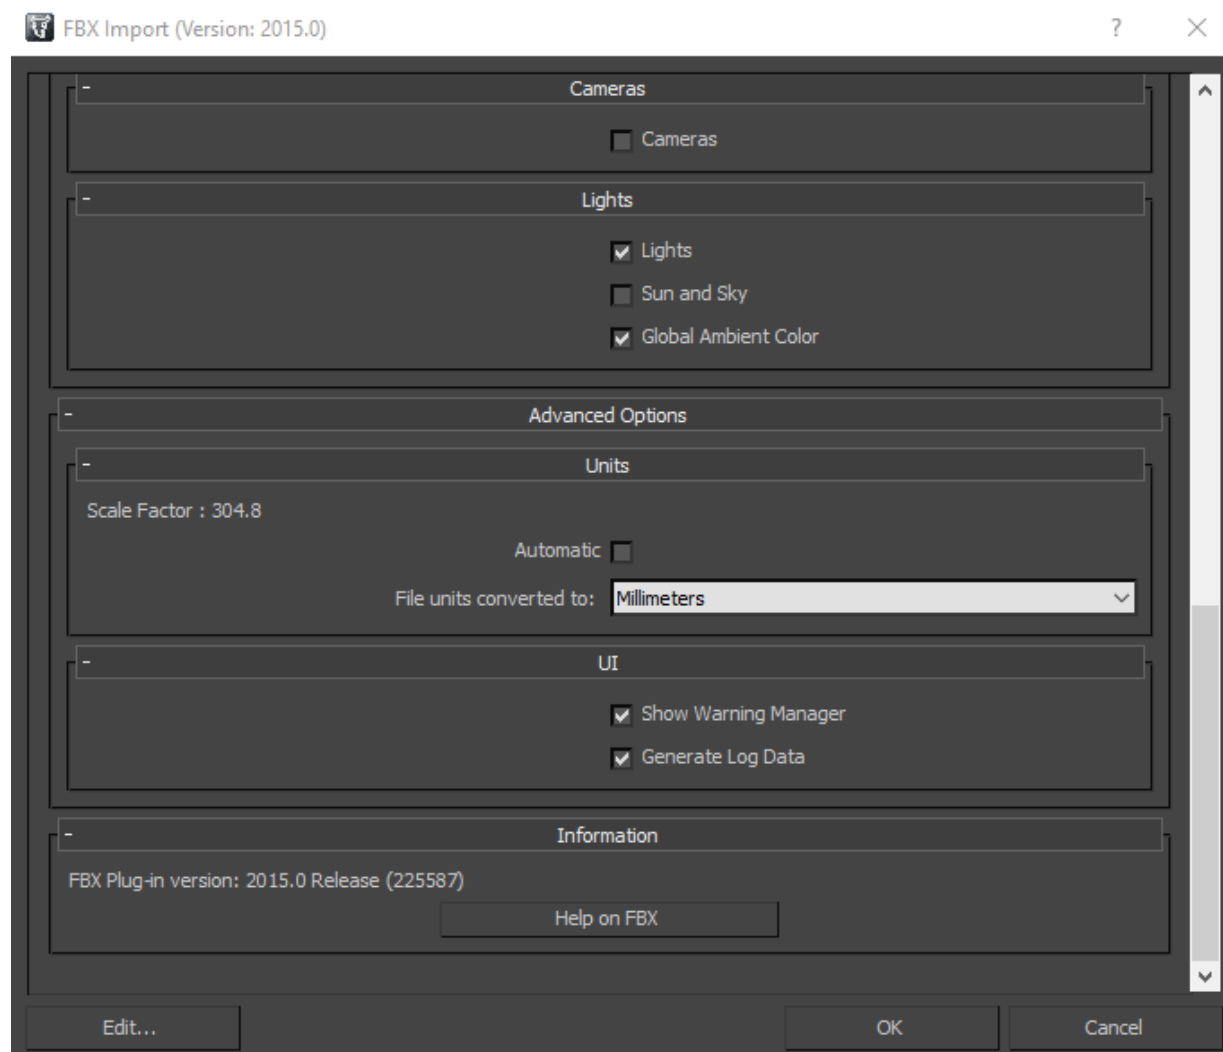

• In Revit, save a **3D View** as an FBX file

- In 3DS Max, import a FBX file into 3ds max

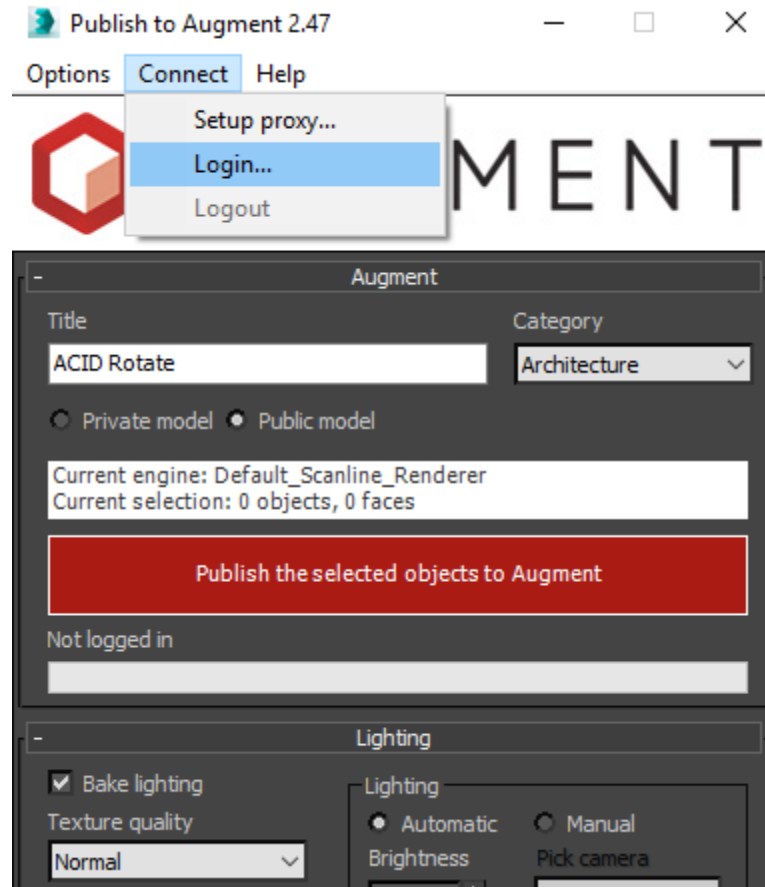

- Check the units > file units converted to millimeters

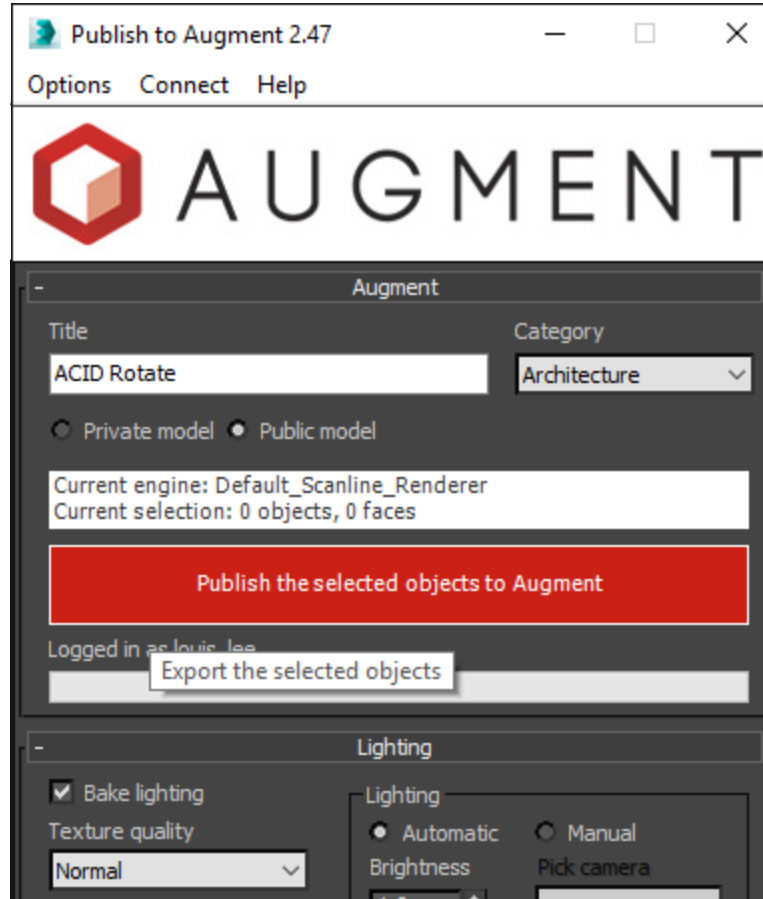

- Download Augment plug-in for 3ds max
<http://augment.com/assets/Augment_3DS_Max_Plugin.mzp>

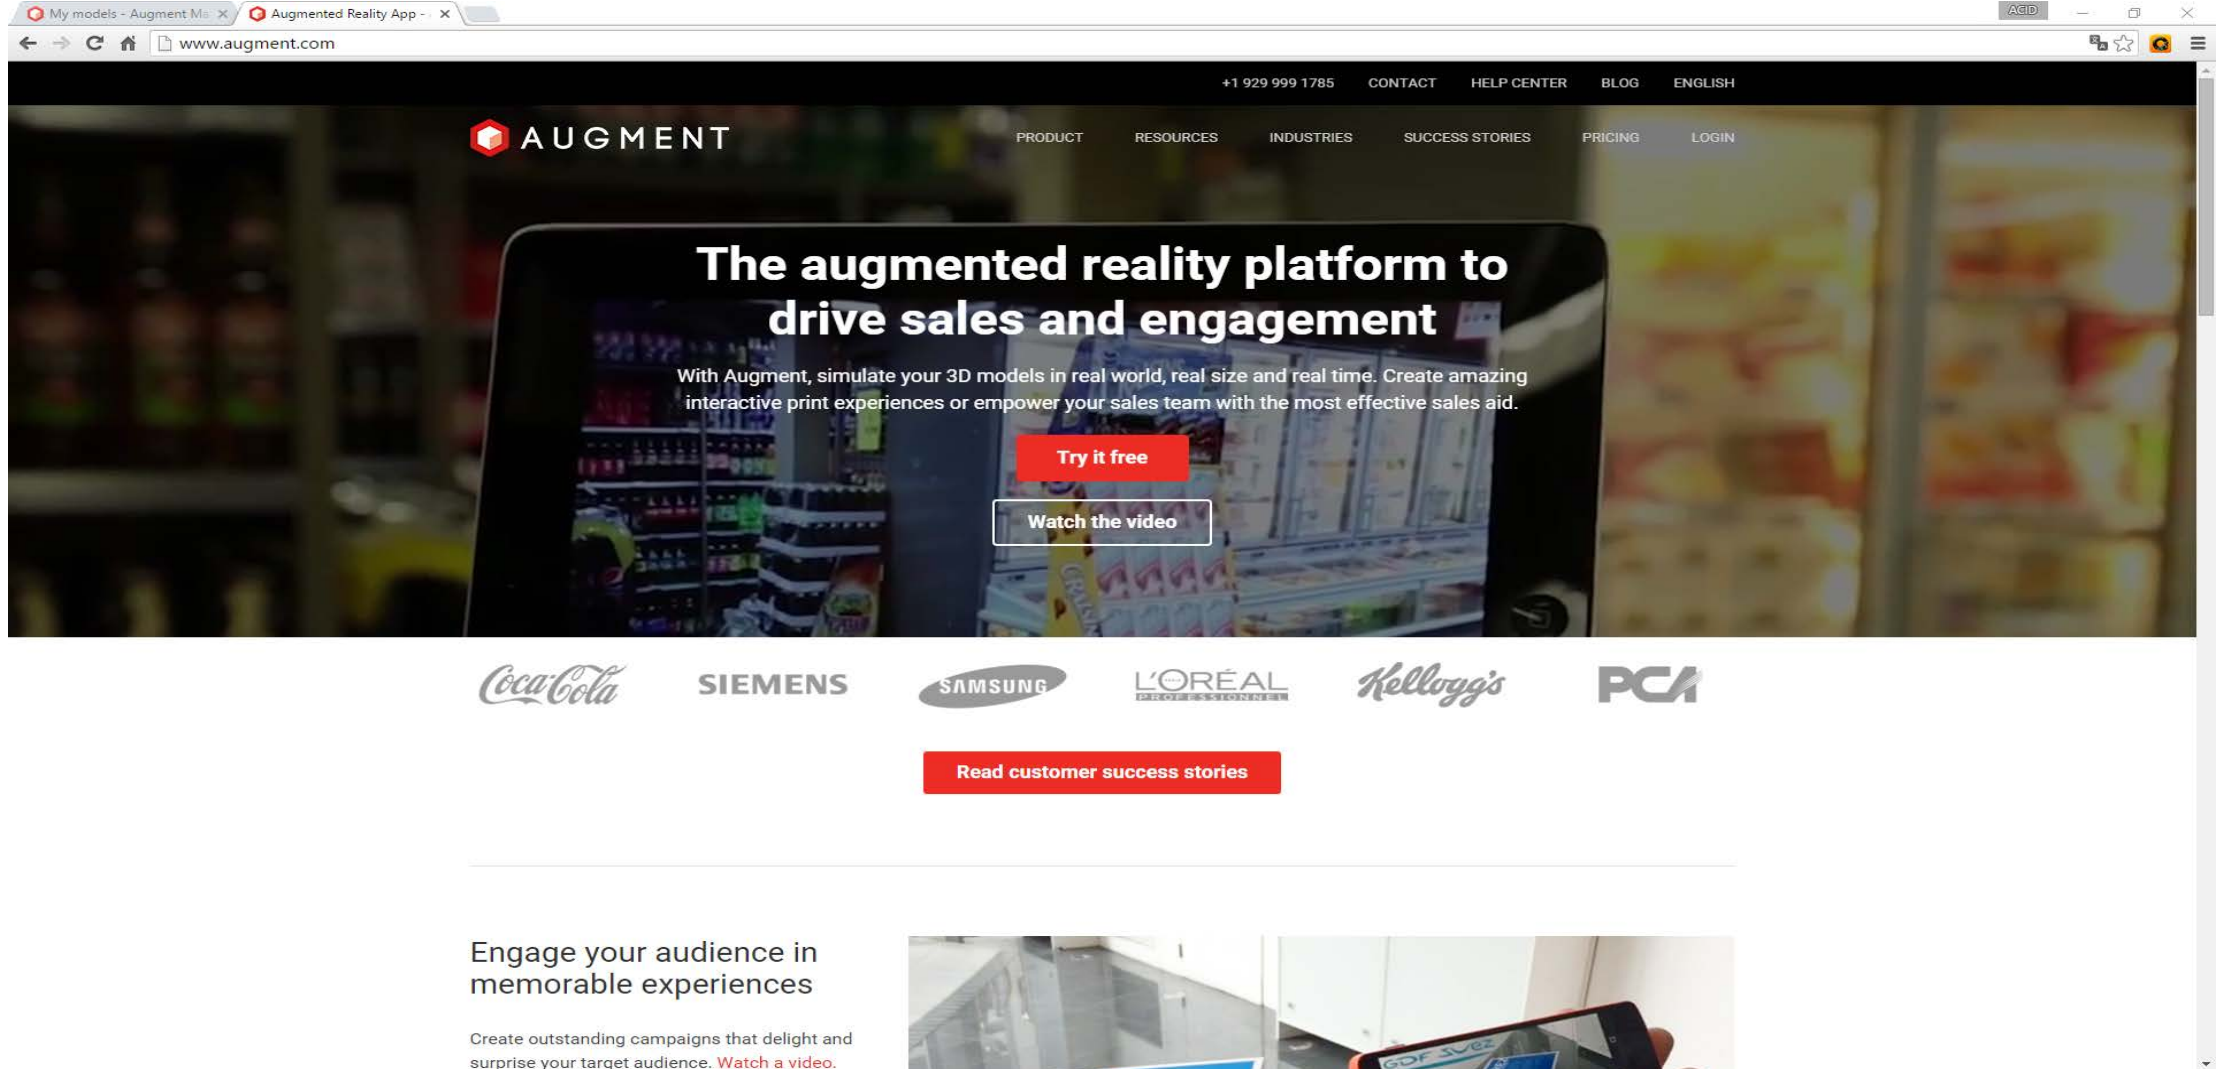

- Login the augment account

- Click “Publish the selected objects to Augment”

- Go to Augment Homepage and Login <<http://www.augment.com/>>

The screenshot shows the Augment website homepage. At the top, there's a navigation bar with the Augment logo, a phone number (+1 929 999 1785), and links for CONTACT, HELP CENTER, BLOG, and ENGLISH. Below this is a secondary navigation bar with links for PRODUCT, RESOURCES, INDUSTRIES, SUCCESS STORIES, PRICING, and LOGIN. The main hero section features a large image of a tablet displaying a virtual grocery store aisle. Overlaid on this image is the text: "The augmented reality platform to drive sales and engagement". Below this text is a sub-headline: "With Augment, simulate your 3D models in real world, real size and real time. Create amazing interactive print experiences or empower your sales team with the most effective sales aid." There are two buttons: "Try it free" (red) and "Watch the video" (white with a black border). Below the hero section is a row of logos for Coca-Cola, SIEMENS, SAMSUNG, L'ORÉAL PROFESSIONNEL, Kellogg's, and PCA. Below the logos is a red button that says "Read customer success stories". At the bottom, there's a section titled "Engage your audience in memorable experiences" with the text "Create outstanding campaigns that delight and surprise your target audience. [Watch a video.](#)". To the right of this text is a small image showing a person using a smartphone to interact with a virtual display.

 Tips:

Augment needs to know the width of your final printed tracker and the dimensions of your 3D model to display it in its actual size.

You can choose to display a 3D model on your tracker as well as redirect to a weblink.

[How to create a custom tracker](#)

- Use iPhone or Android phone download “Augment”
- If want setting the AR model size, location & rotation, need login the account
